

WHITE COTTAGE CEMETERY

The White Cottage Cemetery is located in South Point, OH, at the junction of Solida Road and North Kenova Road, just off new U.S. Route 52. According to the available information, the cemetery was established around 1877, although there are a number of graves dated before then. The site rests on land which was once owned by the Congress of the United States.

All of the information contained in this registry was obtained from the gravestones themselves, since, to the best of anyone's knowledge, the original records of the cemetery have been lost or destroyed. During our research, we identified 312 gravesites, 39 of which must be listed as "unknown", since they are marked only by a rock, or the information on the headstones was unreadable. There are most likely a large number of other graves located in White Cottage, but all evidence of these gravesites has been obliterated through time.

Each existing stone was carefully examined, and the information recorded as accurately as possible. The known graves are listed by number, and can be located on the accompanying map. We sincerely hope that this system will at least make it somewhat easier for those looking for grave locations in the future.

We would like to give a special "thank you" to Mr. John R. Lane of South Point, caretaker of White Cottage Cemetery. Mr. Lane was most helpful in providing what information was available, and he took a great deal of interest in this project. The cemetery site is in excellent condition, and is very well maintained, thanks to his efforts.

In the future, we hope to compile registries of other cemeteries located in Lawrence County. If anyone knows of any of the older cemeteries which may not have available records, feel free to contact us.

Kathy & Tom Clutters
